INTERNSHIP EXPERIENCE

Machine Learning Intern

(Oct 2023 - Dec 2023)

Gained practical experience in implementing machine learning algorithms, data preprocessing pipelines, model training, and performance tuning. Developed and optimized a domain-specific chatbot application leveraging Natural Language Processing (NLP) techniques such as text normalization, tokenization, and TF-IDF-based feature extraction. Integrated cosine similarity-based response retrieval and hyperparameter tuning strategies to enhance system accuracy and response relevance. Improved chatbot efficiency by incorporating stopword removal, stemming, and fallback handling for unrecognized queries.

EDUCATION

Dayananda Sagar Academy Of Technology And Management (Bangalore)

(2021 - 2025)

Bachelor's of Engineering in Artificial Intelligence and Machine Learning

CGPA : 8.63

Ambika Padavi Poorva Vidyalaya (Mangalore)

(2019 - 2021)

Pre-University Course (PCMB)

Percentage : 91.5

PROJECTS

1.TextVision: Multi-Mode OCR and Image Enhancement | *Python , CNN, OpenCV, Streamlit, EasyOCR*

- Built a hybrid OCR system integrating CNN-based image enhancement with EasyOCR for accurate text extraction from low-quality images. Implemented multi-mode preprocessing techniques like CLAHE, bilateral filtering, and thresholding for adaptive enhancement. Trained a custom CNN model on handwritten character datasets to refine noisy text regions. Developed a Streamlit-based web interface for real-time text extraction, structured data export, and LLM-assisted code interpretation.

2.Expense Tracker Web Application | *SQL , Django , HTML , CSS , Bootstrap*

- Developed a full-stack web application for personal financial management, enabling users to log, categorize, and track expenses efficiently. Implemented secure user authentication and CRUD functionalities for managing transactions. Designed a clean, intuitive dashboard with category-wise and monthly analytics using Bootstrap and Chart.js for data visualization.

3.RESTful Stock Market Data Analytics API | *FastAPI, Python, Pandas, yfinance*

- Designed and deployed a REST API to fetch and analyze stock market data in real-time. Integrated endpoints for moving averages, top gainers, and historical analysis using FastAPI and public stock APIs. Delivered clean JSON responses and asynchronous handling via Uvicorn.

TECHNICAL SKILLS

Programming Skills : Python, Java, C, SQL, JavaScript, HTML, CSS

Frameworks : Django, Streamlit, Flask, FastAPI

Database & Libraries : MySQL, Scikit Learn, Matplotlib, OpenCV, NLTK

Tools : GitHub , VS Code, Google Colab, Jupyter Notebook

Concepts & Practices: REST APIs, SDLC, OOP, Agile Development, Clean Code Principles

CERTIFICATIONS

- Career Essentials in Generative AI by Microsoft and LinkedIn.
- Python Foundation Certification By Infosys.
- Agile Project Management By HP Life
